

ALEXANDRIA.

MONDAY EVENING, NOVEMBER 4.

GEN. MAHONE voted to prohibit ex-Confederates from holding commissions in the U. S. army. He also says that Gen. Hampton heard Gen. Lee say he was the right man for his successor, and that Gen. Johnston said he was one of the pluckiest officers in his command which assertions are denied, over their own names, by Gens. Hampton and Johnston. Therefore no exConfederate property in the State will be safe. should vote for him. When rations were scarce in the Confederate army he advised that they be husbanded for the Confederates, and that the Yankee prisoners get along as best they could. Therefore no Union soldier should vote for him. While he was drawing \$25,000 a year from the A. M. & O. R. R., he was buying the claims of laborers on that road at fifty cents in the dollar, and receiving therefor full value. Therefore ne laborer cught to vote for him. He repudiated the State debt, and then offered to put the State in book if her creditors would give him one hundred thousand dollars. Therefore no debt payer should vote for him. He introduced tissue ballots in Virginia. Therefore no man in favor of fair elections should vote for him. He prevented the State from selling her interest in the A., M & O. R R. for six millions of dollars, and finally disposed of it for half a million, which he spent on a negro normal school. Therefore no taxpayer in the State should vote for him. To a preacher in his own city be cursed God, but did not die-Therefore no Caristian should vote for him. He has said that he is in favor of the obliteration of all race distinctions, and had two negroes appointed trustees of the public schools in Richmond, who elect the teachers and superintend the white female schools of man around the polls; but it is entirely diftent city. Therefore no white man should ferent with the negro voters. They are not vote for him. He tried to disfranchise the negroes of Petersburg; he hived negroes in coal pits and sent them to repair imaginary railroad damages, and kept them confined and away until after the close of the polls, and defeated a negro candidate for Congress because that negro was personally objectionable to him. Therefore no negro should vote for him; but nearly every one will. Though elected to the U. S. Senate as a democrat, he sold out to the republicans, and by his one vote gave them control of that body. Therefore no democrat should vote for him. Though a republican, he ran a white, against a negro republican for Congress in his own district last fall, and thereby enabled the democrats to elect their candidate and to keep the State in the democratic column. Therefore no republican should vote for him. His supporters, therefore, must be the negroes, and those white men who hate their white neighbors, those he has bought with offices, promises and money, and those who are so stupid and ignorant as not to know what they are doing.

suffcagist prohibitionist, who spoke here last Saturday night, says the South-that is the white people of the South, from whom all the money that supports the public schools is exacted by heavy taxation-is opposed to education. Mr. Blair lives in New Hampshire and knows as much about southern people as he does about the man in the moon. Col. Armstrong, a northern man in charge of the Hampton school, says southern tax payers are doing more for the edu cation of the negro than any other people; Dr. Owens, of the negro college at Nashville, says the South has acted nobly in dividing its public funds equally between the white and colored schools; Dr. Mayo, a Massachusetts educator, says no other people in the old or new world have done so much in as short a time for the improvement of a similar class of people as those of the South have done for the improvement of the negroes. All of these gentlemen are northern republicans. Rev. Dr. Curry, of the Peabody educational fund, a southern man and a democrat, says Mr. Blair doesn't tell the truth. But Mr. Blair is a mouther, and talks with the recklessness of prejudiced ignorance.

As GENERAL MAHONE has issued his tissue ballots to be used at to morrow's election, as he used to issue them when he ran the democratic machine in the Petersburg | which resulted in the destruction of a quardistrict, it would do no harm if the democratic judges of election who receive the ballots and deposit them in the boxes would be careful to feel them, so as to tell whether they have some of the tissue ballots wrapped up in them. As all double ballots must be thrown out when the count takes place, it would also be well to have the ballot boxes jostled as little as possible, so that if any tissue ballots be wrapped up in the regular sized ballots, they may not be shaken out.

PRESIDENT HARRISON by proclamation has admitted the new States of South and North Dakota into the Union. The Constitution provides that Congress shall admit and Greek papers are unanimous in their new States into the Union, and no where praise of the Emperor and Empress. does it provide that Congress can delegate that authority to the President or to any other power. But the Constitution is the last thing in the world the republican party and its President regard when it interferes with the accomplishment of their own objects. With them, as with the old abolitionists, there is always a "higher law"-that of their own desire-than the Constitution.

hone procession there last Saturday night, there were, by actual count, only 149 white men. But even that small number showed a greater ratio of Mahoneites to white population than can be found in any other city, or in any town, village, or county in the

THE NEW YORK Sun in closing an article on the election in this State to morrow says:

"The democrats of Virginia will receive the most hearty felicitations from their fellow democrats in other States if Mahone is to say that Mahone is not the diabolic mon-strosity now visible to the excited Virginian imagination. He is simply an unscrupulous politician, who means to win if he can, and depends for piety upon the rich stock possessed by the Administration. It is also proper to say that if he is beaten, the Hon. James Gillespie Blaine will eat a particularly large breakfast next Wednesday morning.

THE NEGROES who set fire to the tobacco warehouse at Rocky Mount have been arrested and have confessed that they com mitted that crime because the owner of the building refused to allow it to be used by a Mahone speaker. If Mahone be elected no

Special Correspondence of the Alexs. GAZETTE WASHINGTON, D. C., Nov. 4, 1889. The possible result of to morrow's election and especially of the one to be held in Virginia, is the chief, if not the only topic of conversation here to-day. The Virginia re-publicans here don't besitate to acknowledge that the National Republican Committee has supplied General Mahone with all the money he required, and that at least an average of one thousand dollars has been given to his agents in each of the one hundred counties in the State. If all that money be spent, it will unquestionably buy a good many votes, but the democrats hope and believe that ninety out of every hundred dollars of it will stay where the agents re-ferred to think they will do the most good in their own pockets. An immense number of negroes from this city have been sent to Virginia to vote, and a large number from New Jersey and Pennsylvania passed through here to day on the same mission. So many have left here that only a few of them are seen on the streets to-day. The democrate also have been active in the work of sending their voters home, but unlike the negroes, every one of them is known at his voting precinct. No fraudulent white vote can be polled in Virginia, because every white voter there is known to every other easily identified where they vote, and less easily where they apply for transportation. Both the democratic and Mahone headquarters here, notwithstanding the many people to whom they have already given transportation, have been besieged to day with appli cauts for railroad tickets to all parts of Virginis. Manyof these applicants are not registered and only want to save the fare of a pleasure trip; others do not even intend to go to Virginia, but want to sell the tickets that may be given to them. The sharpers are numerous, and are more successful at the Mahone headquarters, because the democratic, have been established longer, and the clerks there are more experienced

A Boston democrat here to-day, while talking to the GAZETTE's correspondent, said that while every body here seemed to be in terested in the result of the election in Virginia, Ohio and Maryland, be had not heard a word said of that in Massachusetts. He said that though the republicans carried that State by thirty thousand ity last year, he would not be in the least surprised if the democrats car ried it to-morrow. The old republicans there, he said, were mad because their fa vorite, Mr. Crapo, had not been nominated for Governor. The nominee, he said, is a ringster, while the democratic nominee is a young man of unsullied reputation, who

Gen. Matone states to an Index Appeal reporter that the article in the New World purporting to have been an interview with Banker Scorell, of London, concerning himself and the Virginia debt, bas not one word of truth in it. T. A. Fox, a registrar of Dinville, was ar-rested on Saturday and taken to Lynchburg on the charge of erasing names of republicans from the registration books. After a prelimitary examination. Fox was sent on to the grand jury. The democrats are highly indignant, and the whole city is in a state of excitement over the unwarranted inter-ference of United States officials with cit zins just on the eve of a State election.

A special from Richmond to the Philadel phia Record says; Unless all surface indica-tions are at fault Virginia will poll next Tuesday much the largest vote over cast in the State and General Mahone will be de feated by a majority decisive enough, though probably not so large as claimed by the democrat. The fight between Mahone and McKinney is watched with even greater interest in the South than in the North, for it is recognized that the issue is vital to Southern interests. The democratic mana gers are not placing much reliance upon the republican defection from Mahone, for it is believed that most of the kickers will wheel into line and cast their ballots for the little General on election day. Nor are they counting much on negro diseatisfaction with Mahone because of his treatment of Langs'on but they have their hopes of victory up on their complete organization and upon the issue of white or black government which had been raised.

Mahone is now lending all his energies to secure a majority of his adherents in the General Assembly, and it behooves every friend of law, order and good government to unite and work industriously to defeat the machinations of the boss in that direc tion. Another Live Wire.

NEW YORK, Nov. 4 -An electric light current this morning reasted a horse to death, threw the driver to the street and knocked a police sorgeant senseless. As in the Feeks case, the deadly current was carried to its victims through a telephone wire. A big pole carrying numberless wires stands on Fourth avenue near the corner of 28th street. Some time near 4 o'clock this morning one of the wires, a telephone line, fell to the street and formed a loop across the down track of the Fourth avenue railroad. Soon after it fell Thomas Whelan, driver of a Heralddelivery wagon, came along. The horse stepped on the apparently harmless wire and instantly came to a halt and then sprang aside and fell. Toe joit of the vehicle threw Whelan to the street and when he arose to his feet he received a shock which threw him prostrate into the gutter. Regaining his feet again, he undertook to raise the horse, but as he touched the animal another shock passed through him. He then comprehend ed the cause and lay still. Citizens attracted to the scene noticed flashes of blue flame emitting from the prostrate animal. Whelan was assisted to his feet but the horse was given a wide berth. One man ran to the police station and reported the matter. A guard was established at points sufficient ly far from the roasting animal to warn all wayfarers from uearing the fatal spot. Sergeant McDonal I undertook to find the deadly wire, and in making a turn around the wagon he came in contact with it in the darkness. The wire struck him on the fore head and he fell to the pavement senseless as though he had been shot. Roundsman Cassiday went to the rescue of his stricken commander, and when he caught hold of the sergeant's leg he received a shook which compelled him to release his hold. A second effort was more successful and soon after being carried to the sidewalk the sergeant slowly recovered his senses. About 5 o'clock, up to which time the horse continued to roast slowly, it occurred to some one to send to the Manhattan electric light company's shop. Foreman Knight and two linemen visited the scene wearing rubber boots and gloves and found the deadly wire. They pulled it down from the pole and travel was resumed. A deep furrow was burned on the animal's back.

A Terrible Ordeal.

CHICAGO, Nov. 4.-Eight passengers in a street car had a narrow escape from death at the Lake street bridge Sunday. A vessel was approaching and the bridge tender rang the bell. After doing so he let drop the "stop, danger," card at the ends of the bridge, turned on the steam and the bridge began to move. The bridge tender noticed a Milwaukee avenue car approaching on the viaduct, 300 feet away, but supposed the driver would stop. Seeing, however, a moment later that the driver had started down the incline toward the open bridge at a rapid gait the bridge tender realized the possibility of a horrible accideat and at once reversed his engine. He had swund out some twenty feet from the pier and the bridge was moving rap id'y, but a full reversal of the engine brought the heavy iron structure to a standstill with a jolt and then

ponderous trestle work began the to swing back. The eight occupants of the car, having heard the bell The following changes in the 4th class passengers postoffices of Virginia were made to day: in the streets of Kansas City yesterday. It will at such times to see if the car would make it. When they saw that the bridge had moved away and that the driver did not attempt to put on the brake or stop the car they were horror stricken with fear The bridge was now moving back more rapidly, and the frame work fairly trembled with the impulse of the engine under a full head of steam. At the same time the driver was letting out his horses as if determined to plunge into the stream 30 feet below, before the bridge could swing straight. Nearing the jump-off the horses refused to make the leap and swerved to the left. At that instant the south end of the bridge shot even with the tracks and the car jamed full against it with a crash. It was soon pushed back to a place of safety while the trembling passengers growded around the bridge tender and shook his hands.
